Work Experience

Technical Lead Engineer @ Radio Free Asia (RFA)

August 2022 - November 2025 // Washington D.C.

- Architected a high-impact digital transformation of a media site with 10M+ daily users
- Developed and implemented scalable architecture integrating React/Next with AWS (S3, Lambda, CloudFront), reliably serving a global 60M+ weekly audience
- Successfully rolled out 10 multilingual sites, leading the migration of 1.2M articles to Arc XP CMS, integrating SEO best practices, streamlining workflows, and coordinating across departments
- Led technical interviews and hiring decisions, growing the engineering team by 50%
- Fostered a diverse, collaborative, high-performing team of 5 developers adopting best practices in code quality, documentation, and deployment
- Acted as the primary technical liaison between Engineering, Product, and Leadership

Senior Frontend Engineer @ Shaw Industries

March 2021 - July 2022 // Dalton, GA (Remote)

- Designed, prototyped, and implemented key website features in React and Vue, based on business requirements for 2 commercial e-commerce brands supporting 1M+ visitors
- Implemented and facilitated timely delivery of the Product Detail pages redesign driving a 10% increase in sales and a 12% boost in product views
- Led front-end refactoring to adopt modern React and MobX state-management architecture, resulting in 4x faster load times and improved maintainability
- Strategized with business stakeholders to define and prioritize features, ensuring the smooth rollout of high-impact, user-centric solutions amid shifting requirements
- Onboarded new team members, and contracted resources to contribute to the codebase

Frontend Developer @ RNC

June 2020 - Dec 2020 // Washington D.C.

- Led full-cycle development of multiple responsive Single Page Applications, delivered high-visibility applications that reached 3M+ users and have been featured on major news networks
- Implemented React SPA assisting 100k concurrent users to register to vote and look up polling information
- Designed and implemented UI for 5 internal web apps using JavaScript, SASS, Django
- Performed comprehensive cross-platform, cross-browser, and load testing
- Resolved, reported, and tracked bugs, feature requests, UI/UX improvements
